Description	Harrogate water embodies a harmonious balance, enriched with beneficial minerals that elevate its character. Their water is virtually absent of nitrates and nitrites, reflecting the quality of the ground and catchment area.
About Producer	Harrogates story began in 1571 when Harrogate's first mineral spring was discovered by William Slingsby. Harrogate soon became a destination for health & enjoyment, with visitors flocking to 'take the waters' and experience the spa town's vibrant social scene. 450 years on and they're still bringing to life the essence of Harrogate.
