## Description

Fresh cherry tomatoes on the vine are petite, vibrant red tomatoes characterised by their sweet, juicy flavour and delightful tang. These tomatoes grow in clusters attached to the vine, showcasing their freshness and enhancing their shelf life. Their small size and robust taste make them a versatile ingredient, perfect for salads, snacking, or adding bursts of flavour to various dishes.

Ingredient Sourcing	exporters, this ensures fresh quality produce and better delivery. When choosing suppliers, it is not only the product quality we care about but the way they source their products, how they treat their suppliers and the environment. We always check their accreditations, assurance certificates and whether they comply with ETI (Ethical Trading Initiative).
Benchmarking	We regularly cook with our fresh produce in our demonstration kitchen to see how the product holds up during the cooking process and of course most importantly, to taste the flavour and to educate our team.
