Directions for use	<p>Our potatoes are coated in a dry white solution to prevent the peeled product from browning. We work with our potato growers to measure for sugar content in the potato which allows us to modify the dry white solution concentration levels in the coating process. We recommend that before cooking the product, you rinse it in water.</p>

Ingredient Sourcing	<p>We try to source our ingredients direct from local growers or at least UK suppliers as much as possible to help reduce food miles and our carbon footprint, whilst supporting UK suppliers.</p>
Benchmarking	<p>We regularly cook with our freshly prepared produce range in our demonstration kitchen to see how the product holds up during the cooking process and of course most importantly, to taste the flavour and to educate our team.</p>

Additional Information	We source all our potatoes through a local agent who has over 50 years experience of working closely with the best potato growers in the Lincolnshire area, where he has built an extensive supply network.
